Did you just sneeze and simultaneously pee a little? It's ok, it's normal. However, it doesn't have to be, and we are seeking to empower and inform you that as

a woman, this is something you actually work on in Pilates and you might not even know it! So, let us help you connect the dots. Join us for a brief presentation discussing common pelvic floor and women's health dysfunction, including diastasis recti, pelvic organ prolapse, and urge/stress urinary incontinence. We will consider common symptoms, anatomical concepts and offer insight into ways to address and alleviate these conditions.

FREE Presentation, Q&A and a condensed mat Pilates session begins at noon on Saturday, April 9th. We'll also have some refreshments to share. Bring a friend!

<u>Dr. Nicole Lorenz, PT</u> is a Physical Therapist who specializes in treating in individuals with orthopedic and pelvic floor dysfunction. Read her full bio <u>here.</u>
